

Automatic Mug Press Machine

Model:F300s

Max.diameter: 3.35in Max.length: 10.6in

Up to 30oz cup can be made

 Warnings must be followed carefully to avoid body injury.

PRODUCT INTRODUCTION

Product Parameters

Model: F300s	Name: Automatic Mug Press Machine
Heating method: Electric heating coil	
Rated voltage/frequency: 220V-240V~50Hz 100V-120V~60Hz	
Rated power: 550W	
Temperature range: 40°C-190°C(104°F-374°F)	Time range: 1-999s
Press pad size: L10.6in , printing diameter 3.35in	
Net weight: 9.59lbs Gross weight: 10.8lbs	

Turn on: After powering on, short press the power button to turn on the machine, and the machine will automatically heat up.

Turn off: Short press the power button to turn off.

Auto shutdown: The machine will automatically shut down if there is no operation within 30min.

Temperature setting: After turning on, short press the temperature button to enter the temperature setting, press the +/- button to set parameters

Operation button

PRINTING STEPS

Power Cord Inlet

Step1. Connect the power cord to the socket and turn on the power. After powering on, it enters the standby interface.

Step2. Short press the power button to turn on the machine and set the printing temperature and time. For example: 185°C 210S.

11oz mug

Step3. Stick the picture on the mug.

Step4. When the machine reaches the setting temperature, it will make a beeping sound and put the mug in, press the operation button, and the machine starts working.

Tips

1. Increase the transfer time if the color of the transferred pattern is too light.
2. Reduce the transfer time if the color of the transferred pattern is too dark.

Special Note

When printing the mug, a blank cup needs to be placed on the left side to hold it down. Extend the life of the heater.

Step5. After the printing is completed, take out the mug (please wear gloves to prevent burns)

Safety Instruction

Before operating this unit, please read these instructions completely and save them.
