Copyright Statement

Shenzhen Qilin Laser Application Technology Co., LTD. (hereinafter referred to as Qilin Laser) reserves all powers.

Qilin Laser has the patent copyright and intellectual property rights of this product. Without the authorization and permission of Qilin Laser, it shall not directly or indirectly copy, manufacture, process or use the product and its related parts, otherwise Qilin Laser will be investigated for relevant legal liabilities according to law.

Qilin Laser retains the right to modify the documents included in this manual without prior notice, while retaining the right to modify any documents attached to this product.

Users should read this manual carefully when using the products described in this article. Qilin Laser shall not bear the direct, indirect, special, incidental or corresponding losses or liabilities caused by the improper use of this manual or this product. Qilin Laser does not bear the following direct or indirect liabilities or losses:

User shall improperly use this manual or this product The loss caused by the user does not follow the relevant safety operation procedures

The loss caused by natural force makes the machine in the movement dangerous, the user has the responsibility to design an effective error handling and safety protection mechanism in the machine, and Qilin laser has no obligation or responsibility to be responsible for the incidental or corresponding losses caused thereby.

Certification statement

The CE Certification Statement

This product has passed the European Union CE (Communate Europpene) safety, certification, has passed the corresponding conformity assessment procedures and the manufacturer's declaration of conformity, in accordance with the relevant EU directives.

ROHS, the certification statement

This product has been approved by the European Union legislation on restricting the use of certain Hazardous ingredients in electronic and Electrical Equipment (Restriction of Hazardous Substances) safety certification, in accordance with the relevant environmental regulations of the European Union.

FCC Certification statement

This product has been certified by the Federal Communications Commission (Federal Communications Commission) and complies with the relevant safety regulations of American electronic products.

security information

When using the system, please ensure that the operation is correct and safe. Some signs or text will be used to remind you of dangerous matters and some important information.

danger:

Represents a serious danger. In the process of use, if the operation is improper or the use method is wrong, it may lead to serious injury or even death, please users and related personnel do not operate easily, until to ensure that the correct operation method and the correct way of use.

warn:

Indicates that a danger exists. In the process of use, if the operation is improper or the use method is wrong, which may cause injury to the personnel, please do not operate easily, until you ensure that the operation method is correct and the use method is correct.

prudent:

Represents a product potential risk. During use, if the use method is wrong or improper operation, the product or some parts may be damaged. Please users and related personnel do not operate easily until the operation method is correct and the use method is correct before use.

important:

Represents an important information to note during the product. Please do not ignore this information, which provides effective operational help.

This label indicates laser radiation, which will generally be affixed to the product output of laser. Please, be careful of laser and safety when using such equipment.

Receiving goods, unpacking and inspection

The product uses shock-proof soft packaging. If the package has any external damage marks, please check the damage to the equipment and notify the carrier and the carrier of the damage in written documents.

important:

After receiving the product, please check whether the outer package is in good condition, the product and parts after unpacking. If any damage is found, please contact Qilin Laser immediately.

Remove all the goods from the packaging, and keep the packaging materials and wiring spare parts. When dismantling the package and removing the goods,

Please be careful of the goods for safety. After removing the goods, please check if the parts are complete and intact. If any missing parts or parts are damaged, please contact Qilin Laser immediately. If any obvious damage to the equipment, do not install or debug the equipment.

The delivery list of T21 + 1 step double-channel special wire delivery machine is shown in the following table: (As the product will be updated and upgraded, the shipping list may also be adjusted with it)

Packaging list of T21 + 1 dual-channel special wire feeder

- 1		component	quan tity	expl ain
	1 T21 + 1 step-in double-channel wire feeder	1		
	2	3.2 m 600A wire hose (over 1.2-2.0mm wire) 2 + 1.2-1.6 V wire wheel 4	1	
	3	6-m power cord (with 6-star aviation plug)	1	

4	Wire delivery wheel 1.6 / 2.0 (installed)	4	
5	Chassis handle + M8 screw (lock handle screw)	1	
6	Delivery nozzle + V delivery wheel (1.6-1.6)	2	
7	Delivery nozzle + V delivery wheel (2.0-2.0)	2

Chapter 1 summary

The main contents of this section are:

T21 + 1 step in double-channel wire

feeder

Product size chart

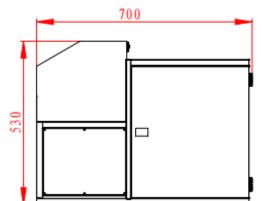

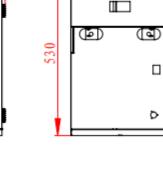

1.1 T21 + 1 step double channel special wire feeder brief introduction

T21 + 1 step two-in dual-channel special wire delivery machine is a wire delivery machine specially used for fiber laser and pulse wire welding combination developed by Qilin laser. Can achieve the fish scale welding, welding effect is uniform, no drag, no lag, with the handheld welding control system for welding, simple and easy can weld out the fish scale grain, greatly improve the effect of welding process.

Chapter 2 System installation and use

The main contents of this section are:

- Silk delivery
- machine
- wiring
- Schematic diagram of the
 - T21 + 1 installation

Human-machine interface

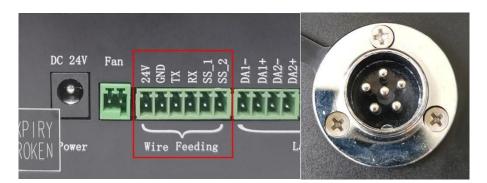

function

Send wire structure

description

2.1 Wire feeder wiring

The connection port of the external control box is connected to the control box of the wire feeding machine

pin	signal	defi nition	expla in
1	24V	Power supply output end of wire feeder	Wfeeder 24V + power interface
2	GND	GND	GND
3	TX	Silk feeder and board card communication port	The wire transmitter communicates with the control system on TX signals
4	RX	Silk feeder and board card communication port	The wire feeder communicates the RX signals with the control system
5	SS_1	Wfeeder trigger signal 1	When short circuit SS_1 and SS_2
6	SS_2	Wfeeder trigger signal 2	When short circuit SS_1 and SS_2

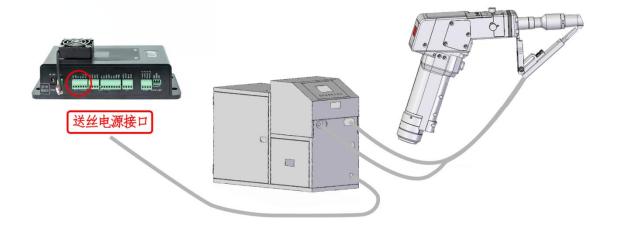

S

important:

Do not connect any instructions in the control box to other lines.

2.2 Installation diagram of T 21 + 1

remarks:

This picture is for reference only. The installation method can be installed according to the installation video of the wire feeder.

2.3 Human-machine interface function

Wfeeder panel: wire machine knob:

① Silk feeding speed: wire feeding machine running speed (mm/s) L: knob to L position, left wire

② Silk delay: first start the laser to the setting time, and then start the wire DBL: knob to the DBL position, double wire

③ Silk filling distance: after the withdrawal stops, the wire compensation distance R: the knob

- to R position, right wire
- ④ Return distance: after the wire stops, the wire draws back distance
- ⑤ Pulse time: pulse delivery time of the wire transmitter (wire delivery time)
- ⑥ Pulse interval: stop pulse time of the wire feeder (stop time)

Settings: Set the parameter button

+: Send wire setting selection +

-: Send wire setting selection-

Continuous wire delivery: set the continuous wire delivery mode.

Pulse wire: set pulse wire mode.

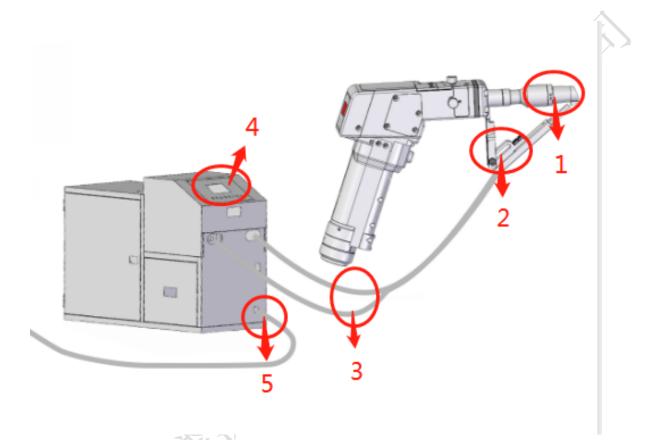

Manual wire delivery: click manual wire delivery, wire delivery wheel to run wire delivery.

Manual withdrawal: click manual withdrawal to send the wire welding wire.

Simulated operation: manually trigger the wire machine during simulated welding.

2.4 Description of the wire delivery structure

1: wire copper nozzle: wire delivery machine can send double 1.2-2.0 silk

2: Double wire delivery fixture: use with the wire delivery machine

3: Double wire delivery hose: use with the wire delivery machine

4: Control panel of wire feeder: parameter parameters of wire feeder to realize pulse or continuous wire feeder

5: Power cord of wire feeding machine: connect the power signal line of wire feeding machine

Quality assurance description:

The warranty period of this product is 12 months, starting from the delivery date. If there is any fault of the product during the warranty period,

Can be sent back to our company, free maintenance, free of labor costs. Appearance parts (wire feeder shell) and consumables (wire clips

Set of) is not in the warranty scope.

All parts of this description, the property right of the book belongs to Shenzhen Qilin Laser Application Technology Co., LTD. Without the permission of the Company, any unit or individual shall not reprint, copy or spread the relevant content of this product description, if the content and information of this product will be changed without notice.

If you have any comments or suggestions on the product and instructions during use, please call for consultation. Tel.: 18018735163

Fax: 0755-27999931

Address: Building 8, Fanmao Industrial Zone, Shuiyin Road, Gongming Street, Guangming District, Shenzhen

Thank you for using the products of Shenzhen Qilin Laser Application Technology Co., LTD.!
