**How to switch interface to English if the Method 1 and Method 2 doesn't work**
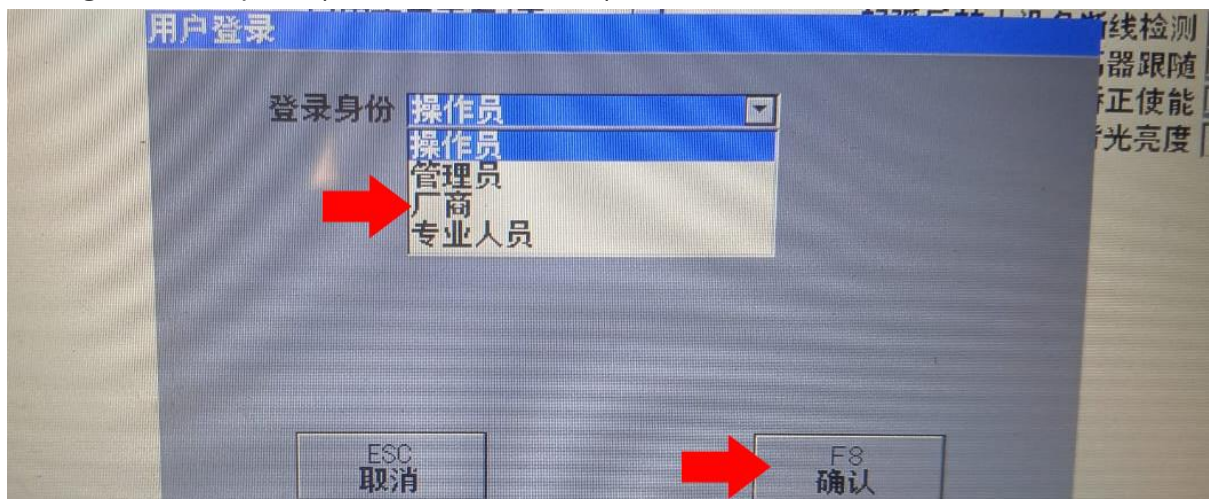

(If you see screen arrangement like this, keep reading)

Click this button (means User Login):

Change to This Option (means Manufacture), and click F8 to confirm:

Password is 6931 and you will see this success message.

Then change this System Edition option, to Standard Edition:

You will see this message (Saving successfully). Reboot and English should appear.

If you are not sure where to find this page. Check Method 1 (Default method) doc.
