# How to switch interface to English if the usual way doesn't work
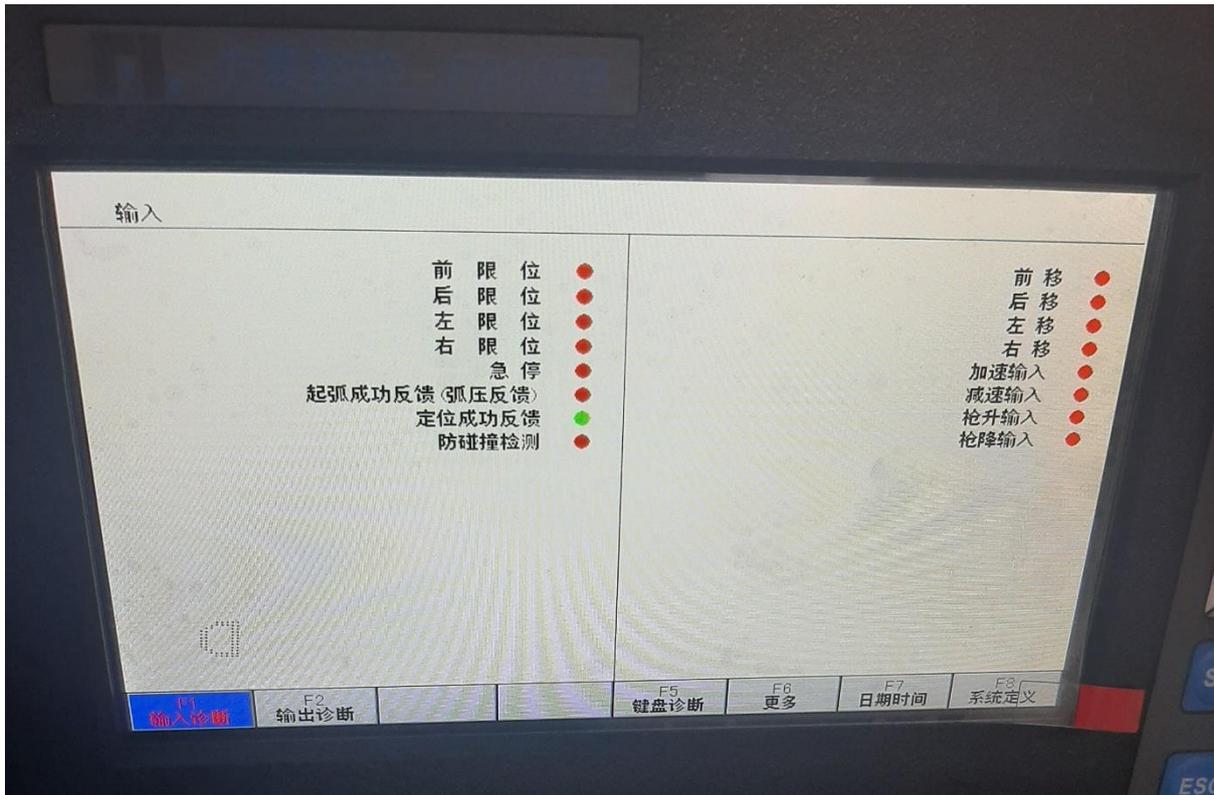

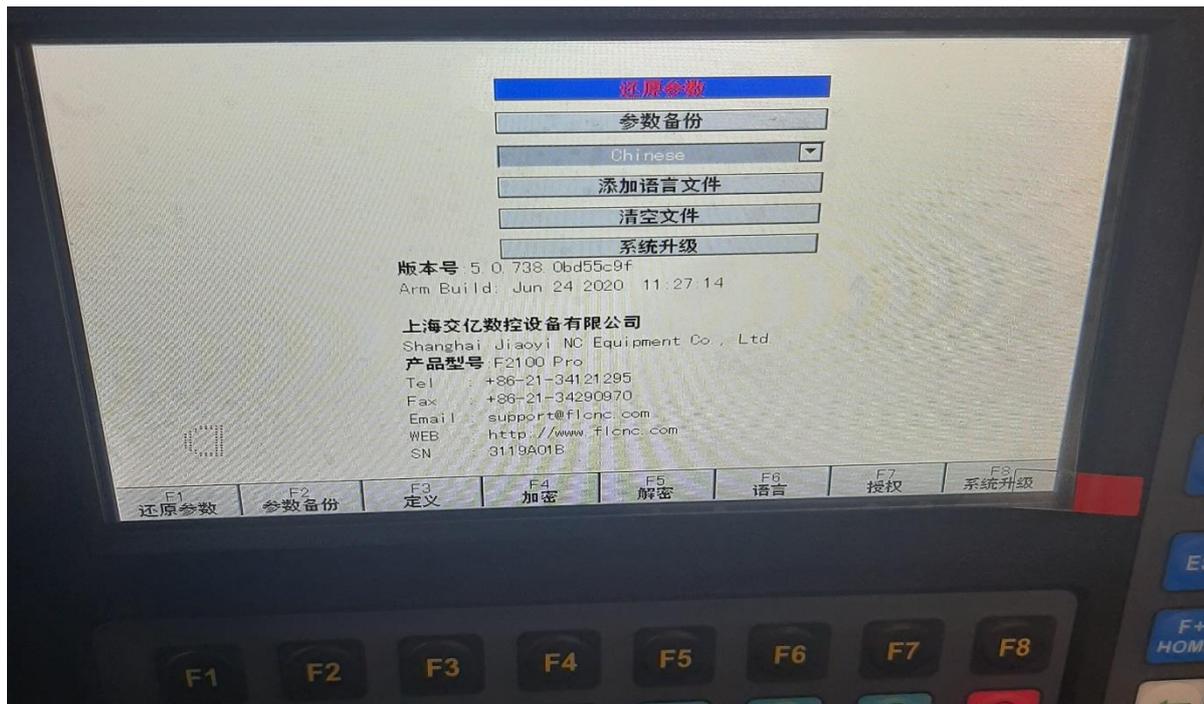

1.Reboot the system or press **ESC** if you don't see the below interface

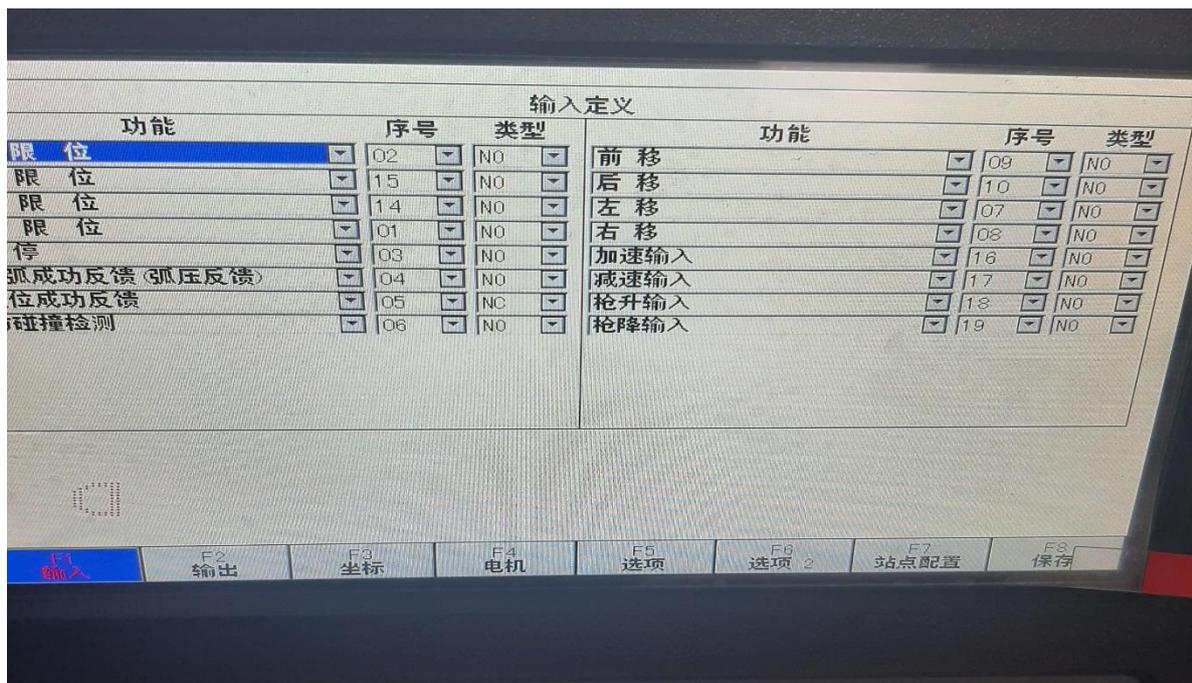

2.Press **F5** you will see the below interface

3. Then Press **F8.** On this interface that's where we usually change our language

4.If you cant change the language on the above interface then Press **F3**. You will land on this interface
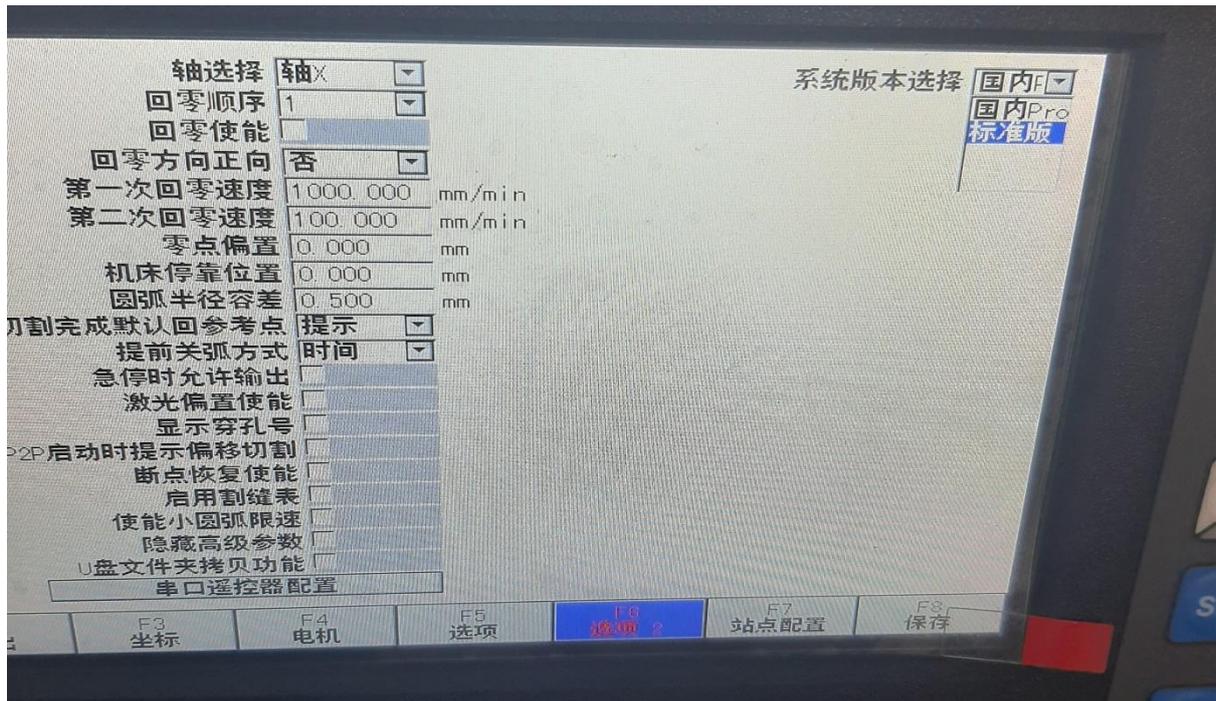

5.Enter the password **1396** and will take you here

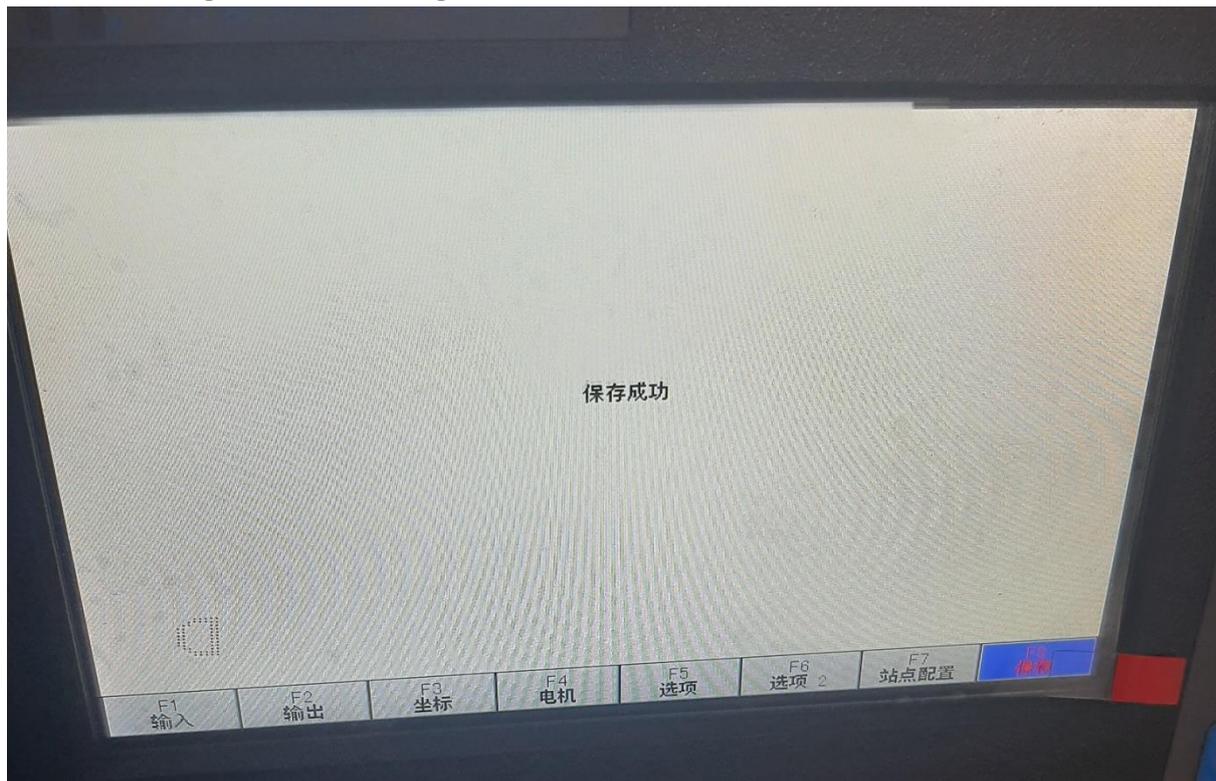

6. Then **F6**

**If you seeing different layout than this one, check Method 3.**

7.At the Top right of the scree n press the down arrow. Select the bottom one and press **ENTER .**Note PRESS **F8** to save

8.Below message shows its saving

9. Press **Esc** to go back to this page. Select your language and Press **Enter** to save

10. Press **ESC** key and go back, your system display language has been changed
